

Waste Site Reclassification Form

Date Submitted: 10/7/2004	Operable Unit(s): 300-FF-2	Control Number: 2004- 102
Originator: CR Webb	Waste Site ID: 400-36	
Phone: 373-5573	Type of Reclassification Action: Rejected: <input type="radio"/> No Action: <input checked="" type="radio"/> Interim Closed Out: <input type="radio"/> Closed Out: <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

The building was originally entered into WIDS as sitecode 4843, from its previous mission as the 4843 Alkali Metal Storage Facility and was a Treatment, Storage and Disposal (TSD). The 4843 site was clean closed as a RCRA TSD unit in 1997. When the 4843 building TSD was Closed Out in 1997, WIDS site code 400-36 was created, at the request of EPA, to track the building's use as a waste transfer station. The building was used as a transfer station to check Hanford garbage (sanitary waste) for radiological or hazardous contaminants prior to transporting the garbage to the Richland Landfill for final disposal.

Basis for reclassification:

The transfer station operations have ceased. The last load of garbage delivered to the building was on July 31, 2002. Subsequent to cessation of operations, the floor area was surveyed. Direct and removable contamination surveys verified contamination above background levels is present.
